INTRO

Though I'm relatively new in the industry, I've spent the last 3+ years polishing my skills to an exceptional level. My skill set in web development includes: building complex projects from the ground up, innovative thinking, implementing of complex interactions, and building responsive UI's. I specialize in React, Next.js, and Typescript.

SKILLS

Programming languages

Javascript, PHP

Web Technologies

React, Next.js, Typescript, HTML, CSS, Sass, Tailwind, Git, Redux, Figma

Professional

Problem solving, Critical thinking, Fast learner, Excellent communicator, Team player

EXPERIENCE

Harbor Inc - Lead Frontend Developer

MAY 2022 - PRESENT

Technologies used: React, CSS, Redux, Git, Figma

- Developed several responsive web applications e.g Harbor's website, Ydev's dashboard, Ydev's web app (rebranded)
- Consumed APIs to send and receive data
- Used JSON web tokens for authentication and authorization (login functionality)
- Developed multiple landing pages for the company
- Made updates and managed an already existing dashboard site
- Currently building a talent outsourcing web application
- Lead a team of 4 developers as the frontend team lead
- Integrated external analytics tools e.g Google Analytics, Microsoft Clarity
- Integrated Hubspot live chat
- Improved websites overall SEO performance by 60%
- Optimized sites to improve load speed by over 50%
- Optimized previously existing codebase: made it cleaner and more structured
- Worked on multiple bug fixes, user interface updates and performance enhancements
- Converted various Figma designs to webpages
- Used Git as my version control system

Wadoo - Frontend Developer

JUNE 2022 - SEPTEMBER 2022

Technologies used: React, CSS, Tailwind, Redux, Git, Figma

- Developed a Dashboard web application
- Used JSON web tokens for authentication and authorization (login functionality)
- Consumed APIs to send and receive data
- Used Git as my version control system
- Changed UI based on role and permissions

Freelance

JAN 2020 - PRESENT

Technologies used: Next, React, Sass, Redux, Git, Figma

- Developed an apartment outsourcing website where users can book apartments to stay in.
- Authentication, authorization, version controlling, API consumption, developing UI from designs, responsiveness, following optimal SEO standards were all performed
- Developed a e-library platform used for the uploading of tutorial videos for university students

Personal Projects

NOV 2019 - PRESENT

Technologies used: Next, React, Node, Sass, Tailwind, Redux, Git, Figma e.t.c

- Developed an invoice application using Node, Express & Mongoose for performing CRUD operations
- Built an ecommerce site using Next for fetching and displaying of products
- Developed a movie recommendation website using React
- Developed a personal portfolio site
- Developed lots of responsive web applications
- Consumed APIs to send and receive data
- Converted various Figma designs to webpages
- Used Git as my version control system

EDUCATION

2019-2023

Bachelor of Science in Computer Science (undergraduate)
Lagos State University, Nigeria

CERTIFICATION

2019-2023

Bachelor of Science in Computer Science (undergraduate)
Lagos State University, Nigeria
